FEDERAL-AID URBAN SYSTEMS PROGRAM NEW PROJECT DATA SHEET

STREET NAME: LOUISIANA AVENU	E PARISH: OUACHITA
From: Wallace Dean Road	To: Wallace Road
Local Project Sponsor: Ouachita Par	rish Police Jury
Project Length: 0.250 Mi.	Average Daily Traffic (ADT): 835 VPD
Preliminary Project Data:	
General Scope of Project:	Reconstruct existing 2-lane collector street with in-place cemen stabilized base course and asphaltic concrete pavement.
Local Functional Classification:	Collector
Type of Pavement	Existing - Asphaltic Concrete
	Proposed - Asphaltic Concrete
No. of Lanes and Width:	Existing - 2 lanes at 9 feet wide
	Proposed - 2 Janes at 10 feet wide
Type of Drainage:	Existing - Open Roadway Ditches (Typīcal)
	Proposed - Open Roadway Ditches
Existing Bridges and Structure Nu None	mbers:
Type of Shoulders:	Existing - Aggregate
F	Proposed - Aggregate
Alignment: x e	xisting new
reliminary Estimated Project Cost:	
Estimated Construction Cost	= \$208,649.00
Contingencies @ 20%	= 41,730.00
Sub-Total - Co	onstruction Costs = \$ 250,379.00
Engineering and Land Surveying Se	ervices * =15,023.00
Total Estimated Project Cost	= \$ 265,402,00
* To be funded by Quash;	

^{*} To be funded by Ouachita Parish

Design Data Responsibility:	
Traffic Count -	Parish
Capacity Analysis -	Parish
Roadway Borings -	Parish
Consultant Selection:	
Parish selected and fi	nanced x
To be selected by LD0	OTD
Construction Financing: Economic Stimulus Funds. Ou surveying services.	Anticipated construction funding source is STP<200K Federal uachita Parish Police Jury will provide funding for engineering and land
